# Future Interns - Blockchain & Crypto Internship

## Task 01: Create Account on a Trusted Crypto Exchange

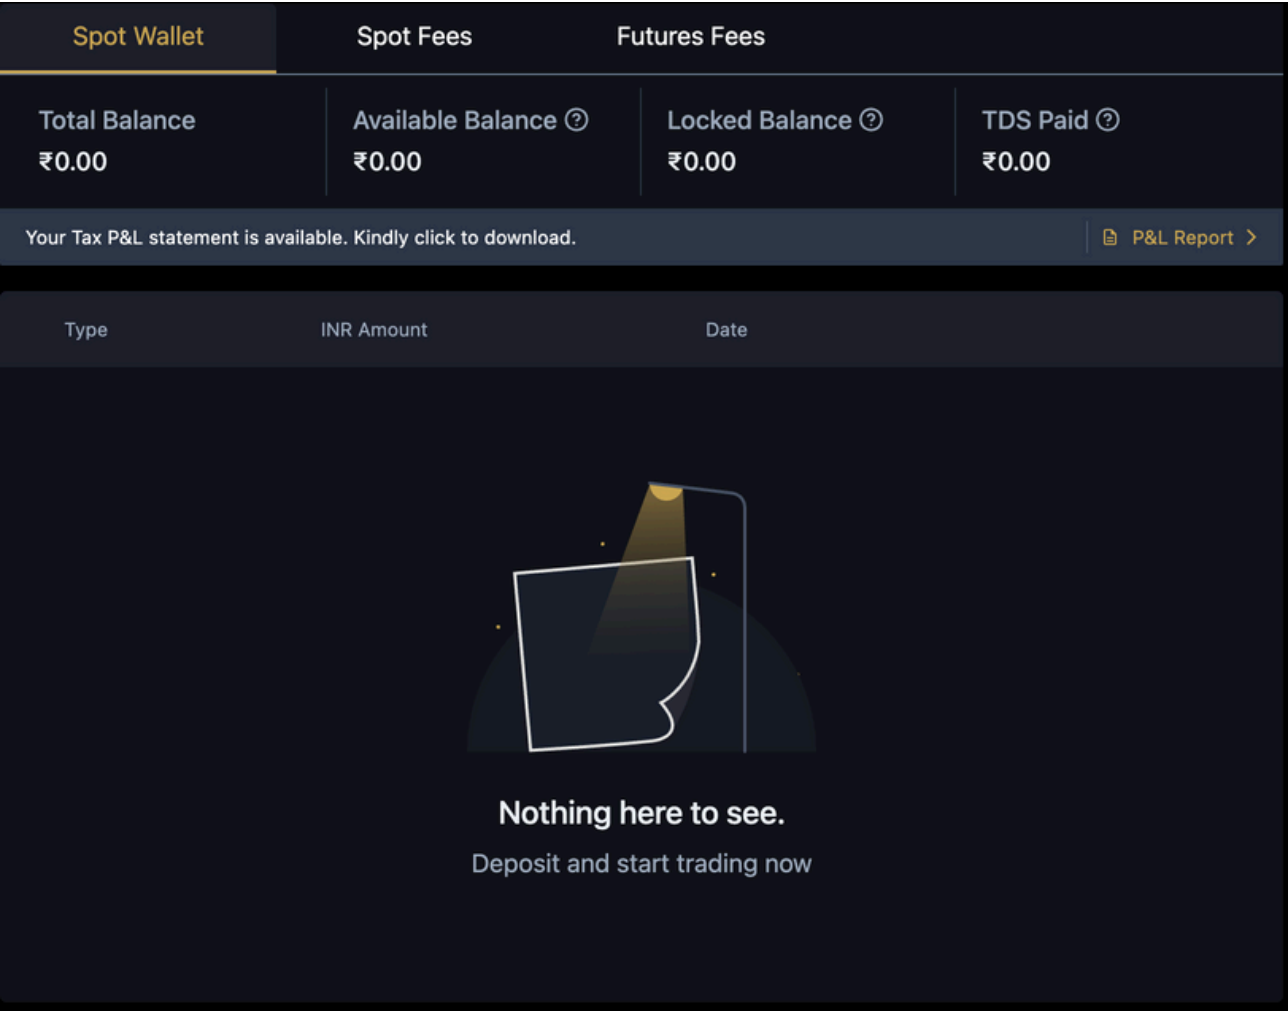

As part of Task 01 for the Blockchain & Crypto internship under Future Interns, I successfully registered and verified my account on CoinSwitch PRO. The aim of this task was to get familiar with real-world crypto exchanges, understand KYC processes, and explore key features such as wallets, market charts, and trading dashboards. Below is a summary of the process and learnings.

1. Registered using my mobile number and email on CoinSwitch PRO.
2. Completed KYC by uploading PAN and Aadhaar verification.
3. Explored the platform's wallet interface, which currently shows INR0.00 balance.
4. Navigated to the trading dashboard and analyzed BTC/INR price movements.
5. Took relevant screenshots for documentation.

This task helped me understand the user journey of crypto exchanges, their UI/UX patterns, and regulatory compliance through KYC. It also gave me practical experience in analyzing live crypto

charts and portfolio tracking.
