Blockchain & Crypto Internship

Task 04 - Participate in Free Airdrops

Submitted by: Siddharth N.R

Intern at Future Interns Date: July
07,2025

Task Overview:

To gain hands-on experience with real-world Web3 airdrop platforms, understand decentralized reward mechanisms, and become familiar with early-stage project onboarding. This task helped me discover new blockchain tools, build reputation systems, and explore eligibility/staking processes.

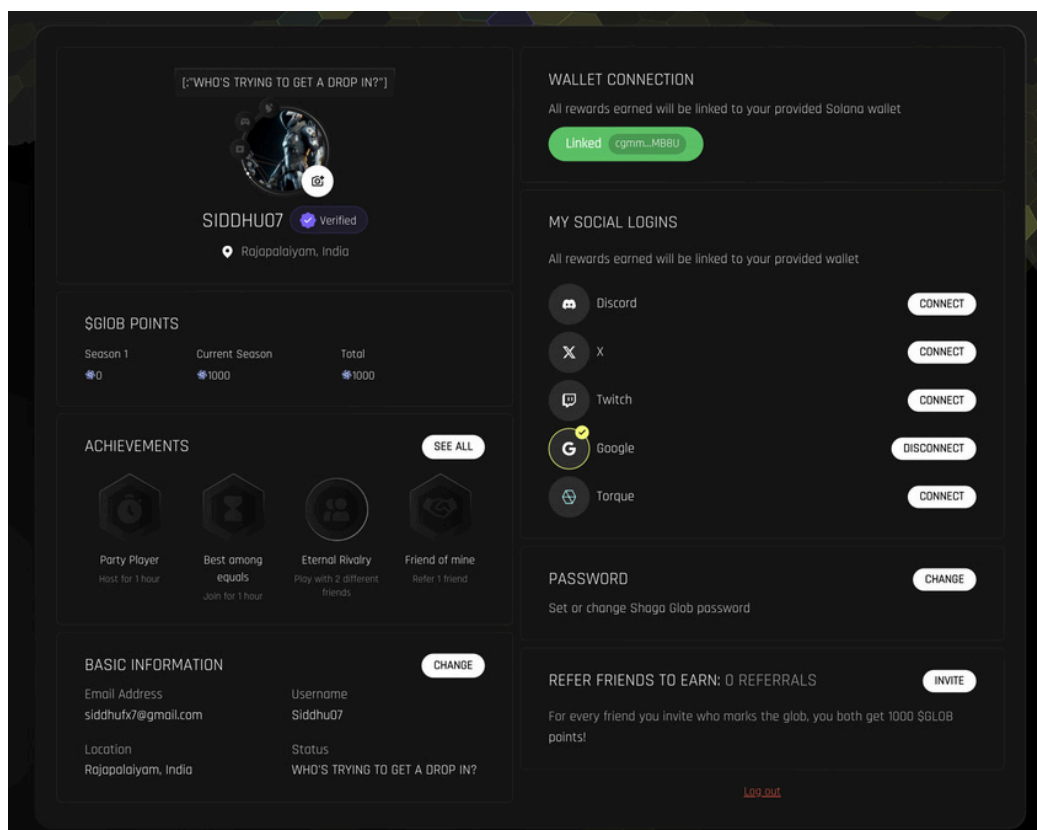

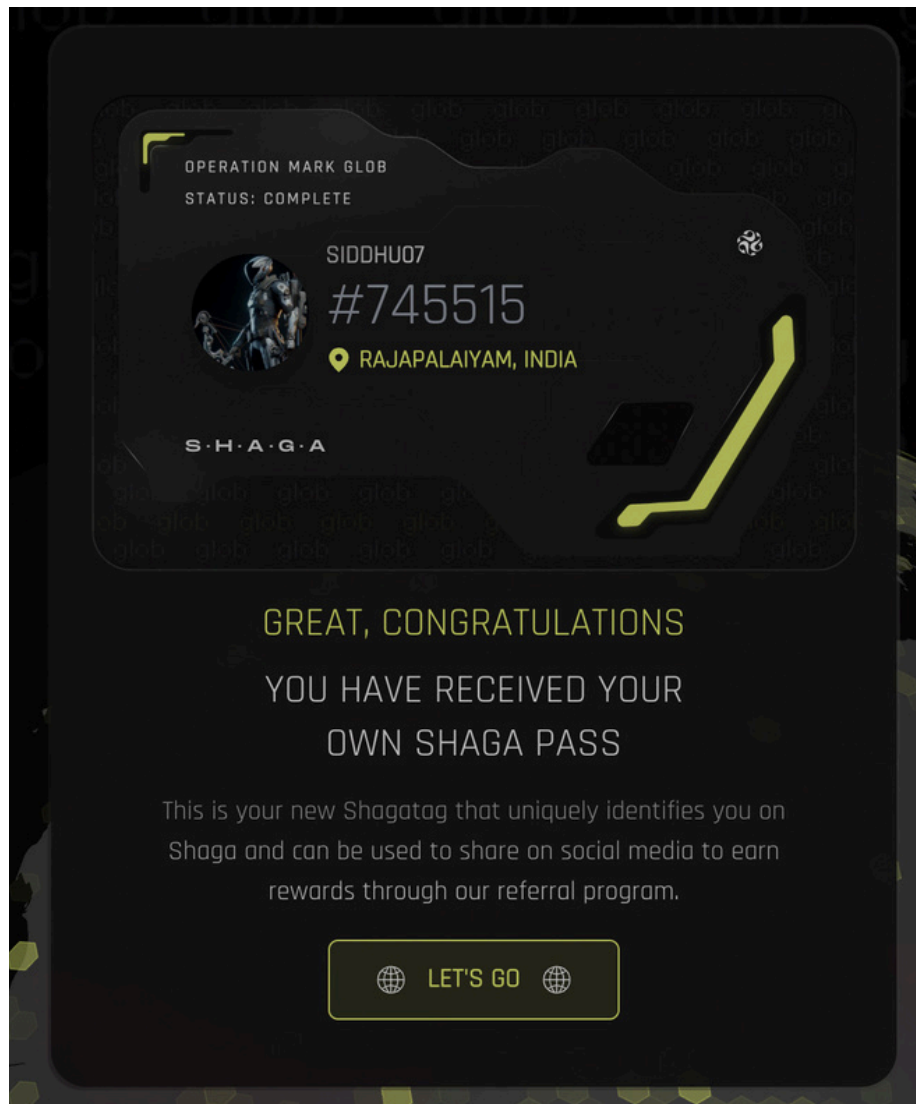

Platforms Participated

- Gradient Network
- Shaga Network
- Magic Newton

Screenshots And Description

1. Shaga – Operation Mark Globe

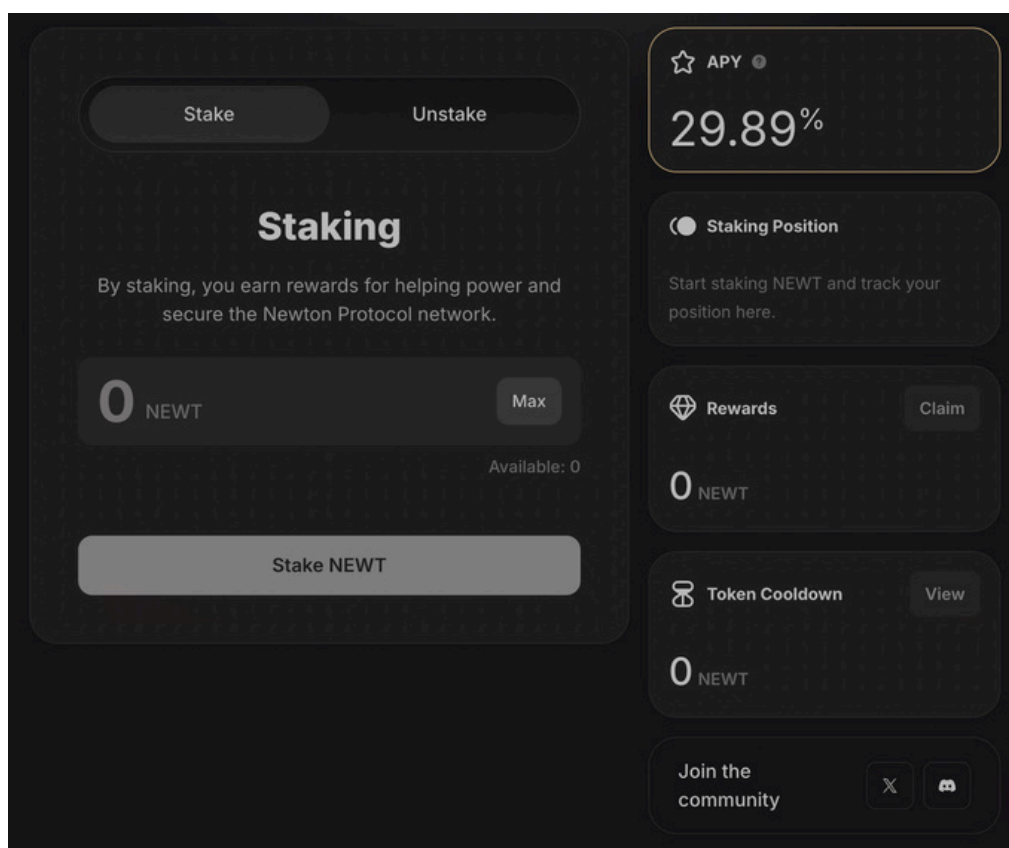

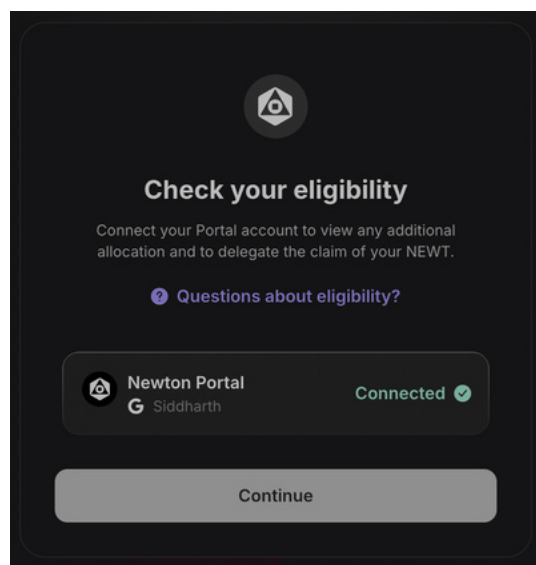

- ✓ Completed: Received SHAGA PASS
 - Username: SIDDHU07
 - Shagatag: #745515
 - Location: Rajapalayam, India
 - Wallet: Solana Wallet Linked
 - Achievements:
 - Party Player
 - Best Among Equals
 - Eternal Rivalry
 - Friend of Mine
 - \$GLOB Points: 1000
 - Socials Linked: Google (verified)

2. Magic Newton – Portal & Staking

✓ Connected & Eligible

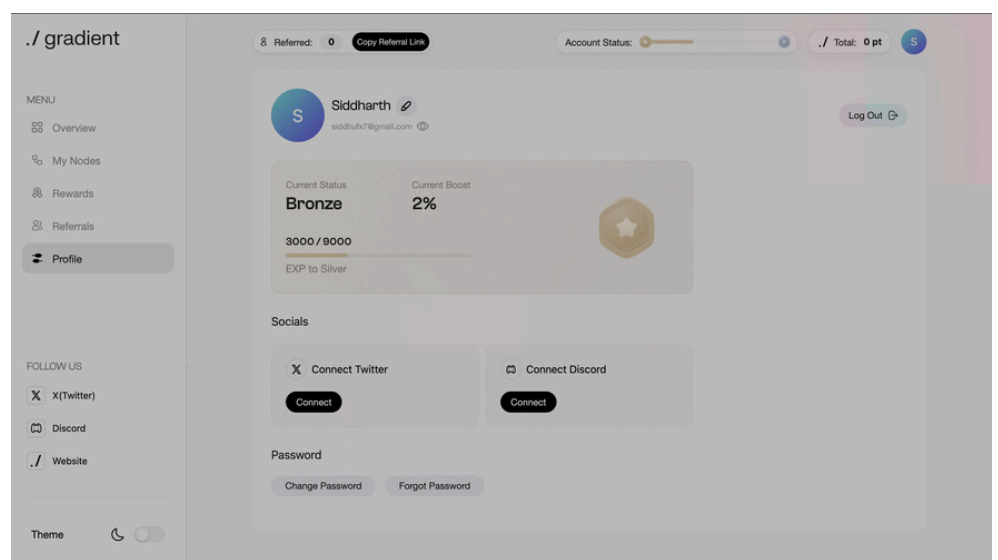

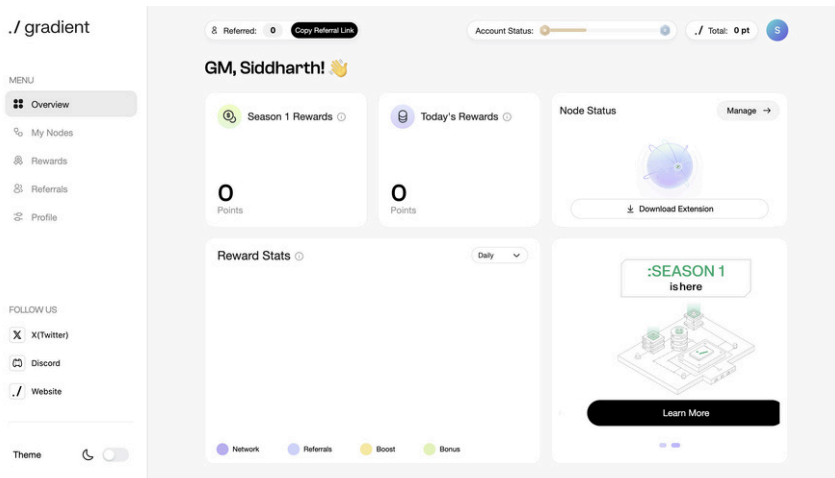

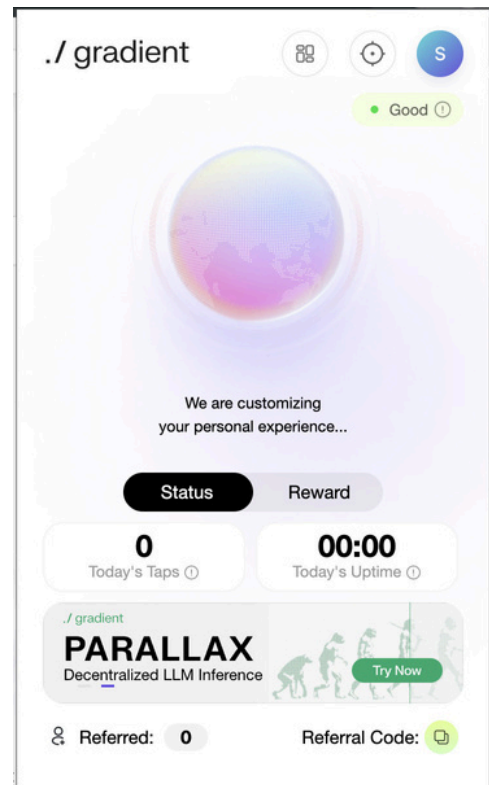

- Portal: Newton Portal
- Account: Connected as Siddharth (via Google)
- Staking Panel:
 - APY: 29.89%
 - NEWT Staked: 0
 - Rewards: 0
- Status: Account is ready for staking and claim delegation

3. Gradient Network – Node & Rewards

✓ Setup and Monitoring

- Status: Bronze (2% Boost)
- EXP to Silver: 3000 / 9000
- Referral Code: Generated
- Points:
 - Season 1: 0
 - Today's Rewards: 0
- Uptime & Taps: Not started
- Node Status: Ready for activation
- Socials: Not yet connected

Key Learnings

- Gained experience with Web3 identity systems
- Understood referral-based growth mechanisms
- Explored AI-integrated Web3 dashboards
- Experienced how staking & gamified rewards work in decentralized ecosystems

Tools & Technologies

- Solana Wallet
- Google OAuth
- Referral Systems
- Real-time Dashboards
- Staking Interfaces

Conclusion

These airdrop platforms (Shaga, Newton, Gradient) represent the future of interactive and incentivized blockchain onboarding. I've gained real-world understanding of how rewards are distributed, how on-chain reputation is built, and how gamification enhances user retention in Web3 protocols.
